

The End of Alzheimers?: A Differential Diagnosis Toward a Cure.

Copyrighted Material

Drs. Lewis and Trempe have written a mind-opening, well-informed, and intelligent account of the history, present and future interventions, and distillation of keen thinking on the subject of Alzheimer's disease. This book will be the focus of many prospective and pivotal discussions on how medical research will eventually govern this mind-shattering disorder.

Jack C. de la Torre, MD, PhD, Senior Editor, Journal of Alzheimer's Disease

The brilliant strategy by Drs. Lewis and Trempe takes advantage of revolutionary new concepts for guiding enhancement of immune function and treatment of chronic infections in prevention and treatment of Alzheimer's disease. The implications of this strategy for the individual and for the population are enormous. Control of dementia, atherosclerosis, and degenerative diseases of aging by the insights of Drs. Lewis and Trempe has the potential for revolutionizing management of chronic disease in the general population.

Kilmer S. McCully, MD, Chief of Pathology and Laboratory Medicine, US Department of Veterans Affairs and pioneer of the Homocysteine Theory
