

Basic English for Science

classwork

unit 6
classwork
section 1

SECTION 1 simple instructions

A When we want people to do things, we use instructions. Instructions can be given in different ways. Spoken instructions can be very direct for example: *Open the window. Close the door.*

Give instructions to other people in the class, using this table. Make sure the instructions are followed correctly. Make up some instructions of your own.

| | |
|-------|--------------|
| Open | your book |
| Close | the window |
| Shut | the door |
| | the cupboard |

Many verbs which are used for instructions are followed by a preposition. For example: *Turn the light on. Switch the radio off.*

Give more instructions, using this table. Again, make sure they are carried out correctly.

| | | |
|--------|-----------|-------------|
| Turn | the chair | up |
| Switch | the light | on |
| Put | your book | off |
| Pick | your hand | down |
| | your pen | round |
| | your desk | upside down |

Now make up your own instructions with these verbs and prepositions:

| | |
|-------------|--------|
| take | off |
| switch/turn | off/on |
| pick | up |
| put | down |
| turn | round |

B In scientific English, we often say _____ instead of *put*. For example:

_____ some copper sulphate crystals on a filter paper.

In everyday English we could say *Put some sugar in your coffee.*

What verbs would we use for these instructions?

1 _____ some water into a beaker.

or _____ a beaker with water.

All sciences, from Physics to Chemistry, from Biology to Information The indefinite repetition of this basic string in the English language. bastelfischlein.com: Basic English for Science (); Peter Donovan: Books.
